## Summary

A beginner front-end developer, eager to learn and enhance skills. Currently pursuing Computer Engineering to deepen understanding, driven by a passion for front-end development and a commitment to continuous improvement.

## Education

**Computer engineering, West Ukrainian National University**

September 2021 - Present

Studied fundamentals of hardware and software, aspiring to become a front-end developer.

## Courses

**FRONTEND developer, GoIT**

November 2022 - May 2023

## Project

### BookShelf

<https://kiiittt.github.io/books-store-3/>

I contributed to code optimization and streamlined the user authentication process, incorporating Firebase for enhanced security and usability, all while working collaboratively with a team. This experience deepened my coding expertise and proficiency in authentication system integration.

### Transloto Plus

<https://vsapiak.github.io/TranslitoPlus/>

During my work on the project, I learned to efficiently convert text, especially from Ukrainian Cyrillic to Latin characters. This experience expanded my skills and understanding in the field of text processing.
